

Attaching machine Perfekt 1800 - front or rear

- > impact-resistant, dimensionally stable, rust-free plastic housing covers brush roller all around for low-dust sweeping
- > roller brush is pendulum suspended, adapts to unevenness and is automatically relieved
- > folding up the side cover allows flush sweeping without additional side brush
- > available for front or rear attachment
- > also available as an industrial version with reinforced frame and heavy duty wheels

It doesn't get any better than "perfect".

	Perfekt 1800
Working width	1800 mm
Brush diameter	600 mm
Brush suspension	pendulum for ideal ground adjustment, automatic brush relief
Depth of collecting box	430 mm
Emptying of collecting box	hydraulically
Swiveling	mechanically / hydraulically
Drive	Gerotormotor
Housing	impact-resistant and dimensionally stable plastic, completely sealed fold-up side panels for flush sweeping
Tires	3 tires with greasable turntable
Flow rate	25 - 50 l/min.
Recommended speed	approx. 200 l/min.
max. operating pressure	180 bar
Weight	approx. 410 kg
Mounting options	via adapter plates as rear or front attachment to various carrier vehicles
